

Research Opportunity

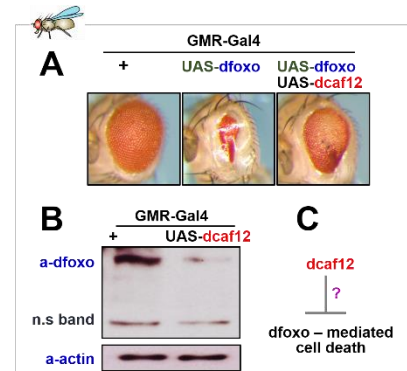

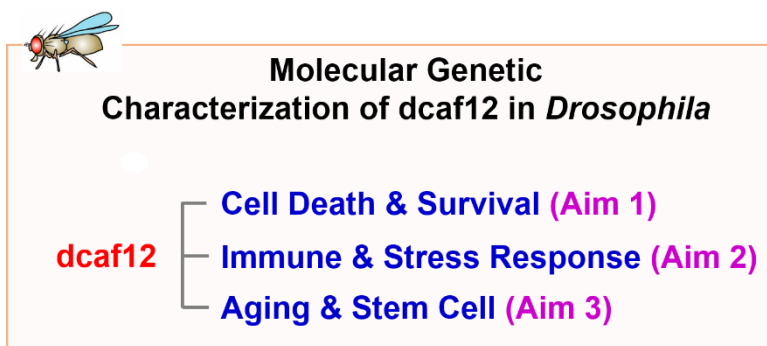

in Molecular & Behavioral Genetics

- Dr. Dae-Sung Hwangbo's laboratory in the Department of Biology is accepting undergraduate and graduate students starting from ~ October 2019:

1) To study the relationships among circadian rhythms, sleep, feeding, and aging using fruit flies as model organisms.

2) To study the function of *dcaf12* gene on cell death, immunity, and aging in fruit flies.

Dae-Sung Hwangbo, PhD
 Assistant Professor of Genetics
 Department of Biology
